## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 to 11, drawn to an electrical package, classified in class 257, subclass 778.
- II. Claims 12 to 21, drawn to method of manufacturing an electrical package, classified in class 438, subclass 15+.
- III. Claims 22 to 30, drawn to an electrical package substrate, classified in class 361, subclass 1+.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and I are related as apparatus and product made. The inventions in this relationship are distinct if either or both of the following can be shown: (1) that the apparatus as claimed is not an obvious apparatus for making the product and the apparatus can be used for making a different product or (2) that the product as claimed can be made by another and materially different apparatus (MPEP § 806.05(g)). In this case instead of before forming the multi-layer interconnection structure over the support substrate, further comprising forming an isolating layer over the support substrate, the isolating layer can be performed afterwards.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by
